Supplement to Commercial Roof-top Units in Minnesota

Gas and Electric Consumption Models

Conservation Applied Research & Development (CARD)
FINAL REPORT

Prepared for: Minnesota Department of Commerce
Division of Energy Resources

Prepared by: Seventhwave and Center for Energy and Environment
ACKNOWLEDGEMENTS
This project was supported in part (or in whole) by a grant from the Minnesota Department of Commerce, Division of Energy Resources, through the Conservation Applied Research and Development (CARD) program, which is funded by Minnesota ratepayers.

The project benefited greatly from the hard work and insights of Ben Auchter, Allison Cardiel, Scott Hackel, Joe Kramer, Scott Pigg, and Hayley Young of Seventhwave. The project also benefited significantly from the time that the building and RTU manufacturer staff took to share valuable information with us. Thank you to all who participated.

DISCLAIMER
This report does not necessarily represent the view(s), opinion(s), or position(s) of the Minnesota Department of Commerce (Commerce), its employees or the State of Minnesota (State). When applicable, the State will evaluate the results of this research for inclusion in Conservation Improvement Program (CIP) portfolios and communicate its recommendations in separate document(s).

Commerce, the State, its employees, contractors, subcontractors, project participants, the organizations listed herein, or any person on behalf of any of the organizations mentioned herein make no warranty, express or implied, with respect to the use of any information, apparatus, method, or process disclosed in this document. Furthermore, the aforementioned parties assume no liability for the information in this report with respect to the use of, or damages resulting from the use of, any information, apparatus, method, or process disclosed in this document; nor does any party represent that the use of this information will not infringe upon privately owned rights.
